Project 3 : Online Calendar

Concept:

I wanted to have a calendar that is easy to use for the user as well as something that can easily be managed. I looked around and I could not find a calendar that had everything that I wanted in it, so I created one. the design of the page is a simple one, It is the same traditional calendar layout. I decided to add a previous and next button next to the month so that the user can easily move from month to month.

This calendar is easy to use as well as something that can easily be added to another website.
